INVESTMENT OBJECTIVE AND STRATEGY

The PNB Institutional Money Market Fund was specifically created to meet the investment needs of institutional investors. It is invested in a portfolio of bank deposits with a remaining term to maturity of not more than three (3) years and has a weighted average portfolio life of one (1) year or less. The Fund aims to outperform its benchmark, which is the 91-day Philippine Treasury-Bill rate auction, net of tax. It is the yield received for investing in a government issued treasury security that has a maturity of 3 months. It is computed based on the auction conducted by the Bureau of the Treasury. The risk profile of the fund's benchmark maybe viewed as conservative, having a maturity of only 3 months. Participants are advised that the fund may invest in securities with a remaining term to maturity of not more than three (3) years but with a weighted average portfolio life of one (1) year or less. Additional information on the benchmark may be obtained from Bloomberg or the Bureau of Treasury website.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The PNB Institutional Money Market Fund is suitable for institutional investors who have conservative risk appetite.
- The Fund's investment horizon shall be one year or less.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- **Liquidity Risk** – The possibility for a Trustor to experience losses due to the Fund's inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- **Credit Risk** – The possibility for a Trustor to experience losses in the event the borrower/issuer defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade.
- **Reinvestment Risk** – This is the risk associated with the possibility that the funds may not be invested at the same rate as it was invested previously.

The Fund's investment strategy and processes are in accordance with the Trustee's written Desk Manual. Regulatory exposure limits are monitored on a regular basis.

COOLING OFF PROVISION

Cooling Off Period – The participant of the Fund may avail of the cooling-off period of two (2) business days immediately following the approval of the participation to cancel his participation without penalty, subject to submission of a written notice during the cooling off period.

MARKET OUTLOOK: LOCAL BOND MARKET

Philippine inflation marks its lowest inflation for 2023 at 3.9% causing the full-year average to 6%, still within the 3.6% to 4.4% BSP's expectation. The main drivers of deceleration were housing, water, power, gas and other fuels, and food and non-alcoholic beverages. This month's figure was not enough to bring the 2023 annual average to the Central Banks target of 2% to 4%. Still, the government remains cautious to keep its monetary policy tight until a continuous downtrend in inflation is seen and they will continue to enforce measures to control inflation while strengthening the economy.

The US Fed, at its December 13 FOMC meeting, kept its policy rate steady at 5.25-5.50% range for a 3rd straight meeting. US Fed Chair Powell stated that the historic tightening of monetary policy is likely over as inflation falls faster than expected and with a discussion of cuts in borrowing costs coming "into view." Market views 4 rate cuts from the US Fed in 2024. The BSP likewise has kept its policy rates unchanged at a 16-year high of 6.50% for a 2nd consecutive meeting last December 14. BSP has raised key rates by 450 basis points since May 2022 to curb inflation.

Local GS yields for the month fell across the curve by an average of 15bps as inflation expectation continue to cool down. The government fully awarded the reissued 10y FXTN 10-71 (with coupon rate of 6.625) at an average rate of 6.224%, where bids reached 2x the auction size. Funds raised from this auction helped the BTr complete its annual domestic funding requirement, therefore cancelling its remaining auctions for the year. In January, the BTr plans to raise Php 195B worth of Treasury bills (Php75B) and Treasury bonds (Php120B), 225% higher than the P60-billion program in December. They will offer P5 billion each in 91-, 182- and 364-day Tbills, while for Tbonds 3Y, 5Y, 7Y and 10Y tenor buckets with P30 billion volume per issue. During the 1st quarter of 2024, BTr plans to borrow a total of P435-billion, with the bulk coming from Treasury bond auctions.
