INVESTMENT OBJECTIVE AND STRATEGY

The PNB Prestige Peso Money Market Fund is invested in a diversified portfolio of bank deposits and fixed income instruments issued by the Philippine government with a remaining term to maturity of not more than three (3) years and has a weighted average portfolio life of one (1) year or less. The Fund aims to outperform its benchmark, which is 50% 91-day Philippine Treasury-Bill rate auction, net of tax and 50% Markit iBoxx ALBI Philippines Money Market. The 91-day Philippine Treasury-Bill rate auction benchmark is the yield received for investing in a government issued treasury security that has a maturity of 3 months. It is computed based on the auction conducted by the Bureau of the Treasury. The Markit iBoxx ALBI Philippines Money Market Index, on the other hand, contains Philippine government bonds and Treasury Bills with a remaining maturity between 3 months up to 1 year. End-of-day closing values are calculated once daily after the close of trading in the market. The indices are calculated every day except on holidays common to all Asian markets. The risk profile of the fund's benchmark maybe viewed as conservative, having a maturity of 3 months up to 1 year. Participants are advised that the fund may invest in securities with a remaining term to maturity of not more than three (3) years but with a weighted average portfolio life of one (1) year or less. Additional information on the benchmark may be obtained from Bloomberg or the Bureau of Treasury website.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The PNB Prestige Peso Money Market Fund is suitable for investors who have conservative risk appetite.
- The Fund's investment horizon shall be one year or less.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- **Liquidity Risk** – The possibility for a Trustor to experience losses due to the Fund's inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- **Credit Risk** – The possibility for a Trustor to experience losses in the event the borrower/issuer defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade.
- **Reinvestment Risk** – This is the risk associated with the possibility that the funds may not be invested at the same rate as it was invested previously.
- **Interest Rate/Price Risk** – This is the possibility for a Trustor to experience losses due to changes in interest rates or due to a decline in the price of a security or a portfolio.

The Fund's investment strategy and processes are in accordance with the Trustee's written Desk Manual. Regulatory exposure limits are monitored on a regular basis.

COOLING OFF PROVISION

MARKET OUTLOOK: LOCAL BOND MARKET

Philippine inflation slowed to 2.8% this January from 3.9% last December as food prices continue to stabilize - the slowest pace since October 2020 with 2.3% print. It is also the second consecutive month that CPI is within BSP’s target of 2-4%. The main driver of deceleration was the slower increase in yearly prices of food and non-alcoholic beverages, dropping to 3.5% from 5.4% the month before. Additionally, the slower annual increase in housing, water, electricity, gas, and other fuels also contributed to the downward trend, decreasing to 0.7% compared to the 1.5% in December 2023. The BSP forecasts that headline inflation will average 3.7% for this year, a decrease from the 6% recorded in 2023 and is expected to further ease to 3.2% by 2025.

Last January 30-31, at its first FOMC meeting, the US Fed kept its policy rate unchanged at 5.25-5.50% range for a 4th straight meeting. US Fed Chair Powell stated that a March rate cut seems unlikely but signaled its openness to cutting them though not necessarily right away until they are more confident on the inflation level. Market is expecting for the US Fed to begin its easing cycle in June 2024 (25bps rate cut and 25bps each quarter thereafter). The BSP is expected to hold its benchmark rate steady at its first policy meeting on Feb 15 and to follow the policy movement of the US Fed. But with the robust economy, this gives the BSP room to cut much later than the FED, BSP Governor Remolona said that they may cut borrowing cost this year but it’s unlikely within the first semester.

Local GS yields for the month rose slightly across the curve by an average of 12bps MoM. The government fully awarded one reissued and three fresh Treasury bonds (Tbonds), reissued 3yr FXTN 03-30 (with coupon rate of 6.00%), 5yr FXTN 05-78 (with coupon rate of 6.125%), 7yr FXTN 07-71 (with coupon rate of 6.125%), and 10yr FXTN 10-72 (with coupon rate of 6.25%) at average rates of 6.007%, 6.073%, 6.094%, and 6.218% respectively. Strong demand was observed for all tenors (bids were more than 2.08-3.5x the auction sizes), specially for the 7yr and 10yr fresh Tbonds where BTr even opened its tap facility to raise Php5 Bn more. For the month of January, the government was able to raise Php211 Bn above its Php195 Bn program (Php130 Bn from Tbond auctions and Php81 Bn from Tbill offerings, both were higher than the original plan of Php75 Bn for T-bills and Php120 Bn for Tbonds). BTr plans to raise Php210 Bn worth of bills and bonds in February, which is 7% higher than the Php195 Bn plan last month, from the domestic market via Treasury bills (Php60 Bn), and Treasury bonds (Php150 Bn) and external sources to help fund budget deficit. They are set to offer bonds with longer tenor, with maturities as high as 20yrs. Weekly bond auctions will have an issue size of Php5 Bn through 91-, 182- and 364d Tbills and Php30 Bn in the 3Y, 5Y, 7Y, 10Y and 20Y tenor buckets.

We recommend extending duration and investing cautiously in securities with longer tenor.
